	Williams Suite	Music Room 1
11.00	<p>Getting more from Infor OS <i>Mark McArdle and Eva Maniega de la Torre, Gradient</i></p> <p>Are you looking at getting more from Infor OS? In this live session, we will show you a simple use case which can be adapted to your specific needs. We will walk you through adding an engineering document to IDM, which is routed through a workflow approval process involving workspaces and widgets, before it is made visible on the items and job order forms in SyteLine/CSI. We'll also show you how the workflow can include updates to CSI records, such as revision numbers on the item record and bundle the new document with the Job Packet Print. With time for questions, this will be a great session for anyone who is looking for some insight into how to make Infor OS part of your everyday working practice.</p>	<p>Leveraging functional capabilities in V10 - what are customers missing out on? <i>Paul Crawshaw, Inforlogic</i></p> <p>Infor have shown their commitment and dedication to R&D for Syteline V10 with the bi-annual Feature Releases we now see a variety of new functionality and capability in the system. We invite you to participate in a focused session that will highlight some of the best new features in version 10 where customers will see the most value add.</p>

11.45	Changeover break
